PRESS RELEASE

CONVEYANT SYSTEMS, INC. RESPONDS TO NORTEL ENTERPRISE SOLUTIONS BUSINESS SALE ANNOUNCEMENT

Santa Ana, California, JULY 27, 2009 -- Conveyant Systems, Inc., today responded to the announcement by Nortel that it has entered into a "stalking horse" sales agreement with Avaya for its Enterprise Solutions business. The company remains committed to its customers, and providing service and support of their products that operate on the Nortel platform.

Tim Kenyon, President of Conveyant Systems, stated, "We are committed to continuing to provide first-rate products and support for our TeleDirectory™ family of PC-based Consoles for Nortel Enterprise Solutions. Conveyant Systems has developed products for Nortel solutions since 1988, and will continue development and support now and in the future."

Kenyon added, "We know that during this period of transition that our friends and associates at Nortel will be dealing with times of concern and uncertainty, as will their customers and other Nortel partners. Conveyant intends to do all that we can to minimize the impact that this may have on our customers and partners and will continue to provide the level of support in all areas that Conveyant has been known to provide for so many years. We look forward to working with both Nortel and Avaya during this transition."

"Regardless of the final outcome, Conveyant Systems will continue to develop products on the existing Nortel platform as well as future releases of the product," said Robert Durbrow, Director of Sales and Business Development for Conveyant Systems.

Durbrow added, "As a Nortel Developer Partner and an Avaya DevConnect Member, Conveyant Systems is properly positioned to support our existing end user customer base, as well as our future customers, with the technology required to provide superior products and service to meet their call processing needs."

ABOUT CONVEYANT SYSTEMS, INC.

Founded in 1987, Conveyant Systems develops, manufactures and markets call handling and processing systems for the Centrex and PBX marketplace. With over 6,000 PC-based Consoles installed around the world, Conveyant remains the leader in specialized console applications and directory products. Conveyant's modular approach to application design provides for a variety of applications in healthcare, hospitality, public service, government, financial and higher education markets.
