## **PRESS RELEASE**

### **CONVEYANT SYSTEMS, INC. CERTIFIES UNIPHYER FROM PHYBRIDGE WITH IT'S SENTRY E9-1-1 SOLUTIONS**

Santa Ana, California, October 4, 2011 -- Conveyant Systems, Inc., the telecommunications industry leading supplier of PC-based Attendant Console applications and E9-1-1 Solutions, announced today that the Uniphyer solution from Phybride is certified to operate with it's Sentry E9-1-1 Solutions.

“We are pleased to have completed certification of the Uniphyer solution from Phybride to operate with Sentry. The integration of our two products allows vital VoIP location information, provided by the Uniphyer solution, to be available to Sentry's Sentinel database. Having up-to-date VoIP location information is a critical piece of any comprehensive E9-1-1 solution,” stated Tim Kenyon, President of Conveyant Systems, Inc.

Kenyon added, “Conveyant Systems is committed to providing secure, automated and cost effective E9-1-1 solutions to our customers, and certifying the Uniphyer solution with Sentry is part of this commitment. Receiving up-to-date VoIP location information from Uniphyer, combined with Sentry’s on-site notification capabilities when a 911 call has been made, provides our customers with an effective tool to help ensure they are prepared in an emergency. Customers can now realize the benefits from the features and functionality of both products for their VoIP telephone systems.”

The award winning Phybridge UniPhyer is the only network switch in the world to deliver Ethernet and Power over Ethernet over a single pair of wire with reach of over 1,200 ft. It was designed to allow businesses to leverage and convert their proven reliable voice infrastructure into an IP network with power ideal for IP telephony deployment. The UniPhyer backbone compliments and extends your existing data switch network with centrally convergence providing a dedicated physical path for voice packets ensuring quality of service regardless of data network loads or health. “The point-to-point topology of a businesses voice infrastructure, the reporting capabilities of the Phybridge UniPhyer combined with the robustness of the Sentry E9-1-1 Solutions by Conveyant is a powerful combination addressing the complexities around location identification of VoIP calls in a simple yet effective manner” says Richard Kasslack, Director at Phybridge. “We believe that the combined solutions not only address local area network barriers but also offers the most robust E911 solution in the market.”

#### ABOUT CONVEYANT SYSTEMS, INC.

Founded in 1987, Conveyant Systems develops and markets the TeleDirectory™ family of PC-based Attendant Consoles and Sentry™ E9-1-1 Solutions for call handling and database information-intensive applications for the PBX, Centrex and VoIP marketplace. Conveyant’s products have been developed with reliability, network compatibility, ease of use and advanced features which provide benefits, including improved customer service, lower labors costs and increased employee productivity.

Conveyant's modular approach to application design provides for a variety of applications in healthcare, hospitality, public service, government, financial and higher education markets. Visit Conveyant Systems' website at <http://www.conveyant.com> or contact Conveyant Systems at (800) 634-3688 for more information about our company, products and services.

## ABOUT PHYBRIDGE

Phybridge's mission is to bring practical innovations to market that provides customers and partners an easier way to deploy and manage their VoIP installs resulting in reduced total cost of ownership and enhanced return on investment. The Phybridge UniPhyer, the only networking switch globally delivering Ethernet and PoE over a single pair with reach of 1,200 feet. Customers are migrating to IP telephony quickly and easy leveraging the existing voice infrastructure to create an optimized converged network. Old Phone Today, IP Phone Tomorrow, Guaranteed QoS.
