

Sentry™ Voice Positioning Center Services

Sentry Voice Positioning Center Services (VPC) provide E911 and NG911 carrier call routing services for enterprise organizations of any size, from the small single location business to the large geographically spread regional customer. **Sentry VPC** will ensure that a 911 call placed from any region when dialed from the customer call server environment will be properly routed to the correct Public Safety Answering Point (PSAP) with the proper location information providing enhanced accuracy to properly dispatch emergency responders to the caller's location.

- Fully compliant with all 911 MLTS regulations and NENA i2 and i3 standards for NG911.
- Accurate caller location information for on-site callers, remote branch offices and remote workers.
- Emergency Call Center special call handling for un-provisioned numbers.
- Can be fully integrated with the Sentry ERM applications.
- Provides ability for the customer to centralize trunks providing a reduction in ongoing costs.
